It was entitled:

Data Envelopment Analysis in the Project Evaluation, with emphasis on IT and RD projects.

The seminar presentation was organized on the 18.09.2015

the date

It was entitled: Wrocław University of Technology and the ENGINE Project

The seminar presentation was organized on the 23.09.2015

the date

It was entitled:

A proposal of fuzzy two stage Data Envelopment Analysis.

Description of scientific activities

(Please describe value added to the ENGINE project i.e. new knowledge, new skills with respect to the objectives of the project, the assigned common area of future cooperation with the partner, plans for common research, projects, publications and how it could be used in the scope of ENGINE)

Prof. Dimitris Despostis and me found two areas where our expertise complemented itself:

- a) IT and RD project evaluation: the Polish side carries out research on IT and RD projects. The Greek side can apply DEA to the evaluation of those projects;
- b) The Greek side works on multistage DEA. The Polish side has experts on fuzzy mathematics and can fuzzify the multistage DEA proposed by the Greek side.

Two papers referring to the above aspect are under preparation.

Information referring to the intellectual property

(the generally binding law in this area in the visited country and procedures of patenting);
