

WT2.8: University of Salamanca

Report

Activities performed during the visit

in Wrocław

period: 29.09.2013 - 1.10.2013

author: Michał Woźniak

1 Personal Information

PROF. EMILIO S. CORCHADO., faculty member of Faculty of Sciences Computers and Automation Department, University of Salamanca visited Wrocław University of Technology, Department of Systems and Computer Networks in the period from 29-09-2013 to 1-10-2013 in order to carry out research and training activities in the fields of hybrid artificial intelligence systems

2 Information about Seminars

The seminar presentation was not organized during this visit, because Prof. Corchado participate in the kick-off meeting. The seminar will be organized during his next visit. Me and some members from my department (Prof. Krzysztof Walkowiak, Dr. Konrad Jackowski, and Mr. Bartosz Krawczyk) were discussing with Prof. Corchado the potential fields of cooperation.

3 Description of scientific activities

We were discussing about the schedule of future visits and possible fields of cooperation. We identified the following perspective topics: (1) designing computing systems for the hybrid artificial intelligent systems based on nature inspired approaches, (2) designing compound classifier, especially based on feature space partitioning, (3) industrial applications. We decided to organize the common session during the HAIS 2014 conference organized by Prof. Corchado's team and we will discuss about common organization CORES conference (organized by WUT) and HAIS in 2015.
